## Professional Summary

Final-year B.Tech CSE student (VIT, 2026) with a strong technical background and a demonstrated ability to analyze complex data, manage cross-functional projects, and communicate insights to diverse stakeholders. As Tech Lead at Meraki: The Fintech Club and Co-Lead of the Data Science Club's Web Team, I have developed the ownership mindset, proactive work ethic, and stakeholder management skills that Techolution's Talent Excellence Intern role demands. My experience in building data-driven dashboards and managing end-to-end product delivery gives me a unique edge in aligning talent resources with project needs.

## Education

**Vellore Institute of Technology**

*B.Tech in Computer Science and Engineering (Health Informatics)*

Oct 2022 – July 2026

GPA: 7.2/10.0

## Skills

**Languages & Querying:** Java, SQL

**Libraries:** React.js, Node.js, Pandas, NumPy, Express.js

**Visualization:** Power BI, Tableau, Excel

**Tools:** Git, Jupyter Notebook, VS Code

**Soft Skills:** Management, Cross-Functional Collaboration, Technical Documentation, PowerPoint Presentations

## Projects

**Healthcare Data Analysis Dashboard** | *Python, SQL, Pandas, Power BI*

- Extracted, cleaned, and analyzed 10,000+ patient records from relational databases; performed validation, outlier handling, and EDA to surface actionable trends.
- Built interactive Power BI dashboards covering admissions, recovery rates, and departmental KPIs — reduced manual reporting time by 60% and enabled data-driven decision-making
- Communicated findings to non-technical stakeholders via structured reports and visual dashboards, demonstrating strong documentation and comprehension skills.

**Sales Conversion and User Behaviour Analyzer** | *Python, Pandas, Matplotlib, Excel*

- Analyzed an 800+ record simulated recruitment dataset using Python and Pandas, identifying key behavioural signals — application source, response time, skill match score — that predicted successful candidate conversion at 78% accuracy.
- Built a cohort analysis framework segmenting candidates by role type, skill cluster, and pipeline stage; documented findings in a structured insight report and visualization deck to support stakeholder-facing talent acquisition decisions.

**Medicare Healthcare Platform** | *React.js, Node.js, MongoDB, Express.js*

- Managed end-to-end delivery of a platform serving 500+ users with a 99.2% uptime SLA — demonstrates unbeatable work ethics and full project scope ownership.
- Designed scalable RESTful APIs and a responsive frontend; reduced API response time by 45% through systematic database optimization — shows ability to grasp complex technical details quickly.
- Maintained HIPAA-compliant data architecture protecting 10,000+ records — demonstrates meticulous documentation and compliance standards.

## Certifications

- AI Foundation Course –Jio Institute
- Introduction to Data Analytics -Simplilearn
- IBM Blockchain Developer –IBM
- MERN Full Stack Development Certification –Ethnus

## Awards & Recognition

**Health Hackathon Participant** | *Johns Hopkins University, USA*

- Selected among top participants to develop AI-powered healthcare data solutions addressing real-world medical challenges.

**Second Position, IEEE Q-RIOSITY Competition** | *VIT Bhopal*

- Secured 2nd rank among 100+ participants demonstrating engineering knowledge and rapid problem-solving.

## Extra-Curricular

- Web Team Co-Lead at Data Science Club – led data-focused technical projects and analytics initiatives for the club.
